Education

Ahsanullah University of Science and Technology

Bachelor of Science in Computer Science and Engineering

- CGPA: 3.7/4.00

Dhaka, Bangladesh

Aug 2019 – Dec 2023

Experience

Senior Software Engineer

Enosis Solutions

Dec 2023 – Present

Dhaka, Bangladesh (Hybrid)

- Designed and implemented scalable microservices using Spring Boot, applying design patterns such as Builder, Facade, Chain of Responsibility, and Unit of Work
- Automated CI/CD pipelines with Jenkins, ArgoCD, and Kubernetes, ensuring reliable and efficient deployments
- Developed and maintained RESTful APIs using RestEasy, integrating AWS S3 and DynamoDB for cloud-based data management
- Improved concurrency, transaction management, and inter-service communication, enhancing system reliability and performance
- Collaborated with cross-functional teams to troubleshoot production issues and streamline microservice dependencies

Projects

Savings and Loan Microservice | *Spring Boot, Kubernetes, Jenkins, ArgoCD, Kibana*

2024–Present

- Implemented design patterns (*Builder, Facade, Chain of Responsibility, Unit of Work*) for a scalable microservice architecture.
- Worked on schedulers and cron jobs for automated processes.
- Utilized GitHub Actions, Jenkins, ArgoCD, and Kibana to manage CI/CD and monitoring.
- Maintained and resolved issues with various Kubernetes PODs and clusters.
- Collaborated with multiple teams to resolve microservice dependencies.
- Learned and developed using a new, proprietary programming language.

Community Voting System | *RestEasy, Docker, AWS (S3, DynamoDB)*

2024

- Built backend services primarily using RestEasy.
- Employed Docker and AWS for deployment and scalability.
- Gained proficiency in AWS S3 for media storage and DynamoDB for vote data management.
- Applied design patterns such as *Singleton, Factory, Observer, and Strategy*.
- Learned concurrency and transaction management for singleton beans.
- Developed reusable code that can be exported as shared libraries.

Leave Portal | *Angular, Spring Boot, RxJS*

2023–2024

- Developed using Angular for the frontend and Spring Boot for the backend.
- Implemented integrated state management to replace the existing communication service.
- Created reusable Angular components for scalability and consistency.
- Utilized a reactive approach with Observables for API calls and inter-component communication.

Technical Skills

Languages: Java, TypeScript, JavaScript, SQL

Frameworks & Libraries: Spring Boot, RestEasy, Angular, RxJS (Observables)

Databases & ORM: Hibernate, Spring Data JPA, MongoDB, MySQL, SQL Server, PostgreSQL

Cloud & DevOps: AWS (S3, DynamoDB), Docker, Kubernetes, Jenkins, ArgoCD, GitHub Actions

Design Patterns: Builder, Facade, Chain of Responsibility, Unit of Work, Singleton, Factory, Observer, Strategy

Development Methodologies: Agile, BDD/TDD, Pair Programming

Concepts: Microservices Architecture, CI/CD, Reactive Programming, Concurrency, Transaction Management
